The Most Important Step.

Exceptional Skin Care  
Gives You Beautiful Skin.

Beautiful Make Up Starts  
With Beautiful Skin.

All About

# NIGEHBAN'S Customized Peels

## Jessner's Peel Solution *Get your glow back*

Medium depth peeling agent helps to smooth fine lines, acne scarring & skin discoloration. It can act as a customized treatment for more extensive skin damage.

## Lactic Acid Peel Solution *Rejuvenate Skin*

Lactic Acid is shown to inhibit tyrosinase enzyme activity directly, so it is a key peel to use when dealing with pigmentation issues. It will also help to exfoliate dull skin.

## Salicylic Acid Peel Solution *Peel Away Imperfection.*

Salicylic Acid Peel will reduce dark spots, treat acne, blackheads, whiteheads & sun damage.

## TCA Peel Solution *The Perfect Peel For Radiant Spotless Skin.*

TCA is a non-toxic chemical agent used for the treatment of melasma, reduced sun damage, brown spots & make your skin refresh & renew.

## Mandelic Acid Peel Solution *The Magic Wand*

Remove dead cells, potent formulation with stunning results without risks of post inflammatory hyper-pigmentation & it is an excellent choice for all skin types.

Sittings vary person to person, depend on skin condition.

### After First Use

The Skin will have a pleasant healthy glow at first, then peeling will begin around 2 days after.

### After 3-10 Days

Skin will exfoliate or flake, shedding the dead cells. This will also unclog pores & leave the skin feeling smooth & rejuvenated.

### After 3-4 Weeks

This is when the long-term benefits take place. The collagen & cells will have regenerated & the face will have a younger & healthier look & feel.
